

HOW TO PARTICIPATE TWO LEVELS

1. Partners.

Companies that manufacture or handle plastic pellets, flakes and powder.

2. Supporters.

Organizations (for profit or nonprofit companies; incorporated trade associations; and unincorporated coalitions) that do not qualify for partnership (i.e., do not manufacture or handle resin pellets, flakes or powder) but support the efforts of OCS to prevent pellet, flake and powder in the environment.

TAKE THE PLEDGE:

Keep plastics pellets in check.

Demonstrate that your company is committed to helping keep resin pellets, flakes and powder out of the environment.

OPERATION CLEAN SWEEP® (OCS) is an international program designed to prevent resin pellets, flakes and powder loss and help keep pellets out of the marine environment. Every segment of the plastics industry has a role to play — including resin producers, transporters, bulk terminal operators, plastics processors and recyclers — by implementing good housekeeping and containment practices. Spilled pellets, flakes and powder can make their way into local waters and eventually end up in our oceans where they create both a litter problem and a threat to sea life. Reducing such loss can only be achieved with your help. When you take the pledge and implement the OCS program, the environment wins and so does your company.

Pledging will help strengthen your company's:

- Contribution to preserving water quality and wildlife
- Compliance with federal, state, provincial and municipal regulations
- Employee health and safety
- Operational efficiency
- Financial bottom line
- Reputation in the community

Visit OPCLEANSWEEP.ORG to learn more about Operation Clean Sweep® and for tools that can help your company work towards Zero Pellet Loss.
